At STRYME, we pioneer innovative high-tech broadcast and automation solutions for OB-Van, live, sports and news productions. As the Austrian market leader, we excel with uncompromising quality and reliable out-of-the-box solutions that simplify, speed up and optimize daily workflows. We give small, medium-sized and specialized broadcasters the edge.

**STRYME provides the right solutions for tomorrow's broadcasting needs.**

We advance broadcast technologies as well as industry standards. Our customers can rest assured that the solutions they receive from us meet their exacting needs and budgets. We know, setting up a future-proof channel is complex. Its many interconnected elements cost money. Each individual component must work in sync to ensure smooth, simplified workflows. Each new solution must guarantee reliable and efficient channel operations.

STRYME was founded by Goce Zdravkoski in 2005 to fill a market gap. It was initially called Pixel Software Development and started off as a turnkey video server developer for broadcasters. Its very first customer was the Austrian Broadcast Corporation (ORF). The close collaboration with a hub of expertise made STRYME a valued and trusted industry partner for bespoke professional broadcasting solutions. It also kicked off a wide range of different projects in Austria, Germany, Switzerland, Slovakia, Italy, Russia or South Korea.

SO SIMPLE, SO EFFICIENT  
**SO STRYME**

We innovate to deliver superior technical performance. In doing so, we tackle each project with passion, perseverance and professionalism. We provide the tools and solutions our customers need to master any new challenge. We give them more flexibility, keep their standards high and step up efficiency and usability.

We guarantee high-availability for a 24/7 fail-safe operation. That's the promise we keep. Because for us, providing the right solutions for tomorrow's needs also means that these solutions are top-notch and unique – in terms of performance, stability and price. That's quality made by STRYME.

# WE LOVE WHAT WE DO

### Clemens Czepe

Chief Technical Officer

"Choosing STRYME means you are one step ahead of your competition in terms of price and technology without having to worry about technical specifications or software that is prone to errors. Choosing STRYME means you can focus on what matters most!"

### Goce Zdravkoski

Chief Executive Officer & Founder

"It's not about offering the latest industry features – we do that anyway – but about meeting and exceeding our customers' expectations. It's about making sure they experience how we from STRYME simplify and automate their daily working processes."

# EVERY FORMAT. EVERY CODEC. EVERYTHING.

# GENESIX StreamViewer

## Quality MADE IN AUSTRIA.

GENESIX is an all-in-one ingest, graphic and playout solution for small and medium-sized broadcasters. Features such as multi-channel playout, playout automation, overlay graphics, traffic management, asset management and program scheduling ensure reliable operation and integration into existing infrastructures and workflows. Support of all industry standard codecs and formats ensures maximum compatibility and flexibility.

Ingest, Playout and Media Asset Management are part of the basic configuration.

STRYME forges ahead into the future of broadcasting with its 9<sup>th</sup> generation flagship product. Redesigned to ingeniously ingest every format and every codec – used today and still to come – the GENESIX VideoServer V9 sets new standards.

Viewing experiences change. Platforms evolve in a snap. Codecs and formats are short-lived. Keeping up to date, maintaining smooth workflows and producing quality footage takes a lot of effort.

Let the GENESIX StreamViewer Platform work for you.

Monetize your workflows – get more formats for less money

scenario 1: Facebook (Social Media) directly on air

scenario 2: mobile streaming directly to AVID Interplay

scenario 3: H.264 stream directly to post production

## A single GENESIX VideoServer is all it takes to:

Encode, decode and upscale every format and every codec – as needed

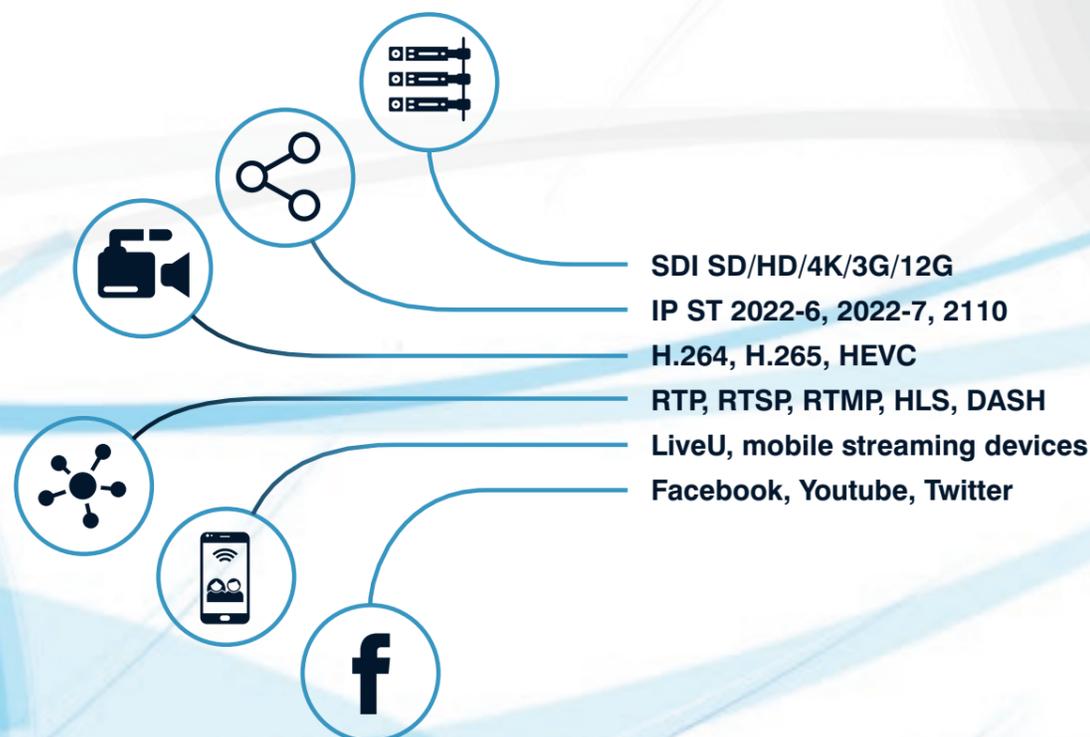

- ✓ SDI SD/HD/4K/3G/12G
- ✓ IP ST 2022-6, 2022-7, 2110
- ✓ H.264, H.265, HEVC
- ✓ RTP, RTSP, RTMP, HLS, DASH
- ✓ LiveU, mobile streaming devices
- ✓ Facebook, Youtube, Twitter

- ✓ Up to 16 channels flexibly configured
- ✓ 4K UHD ready (XAVC, ProRes)
- ✓ Ultra-slim 2U
- ✓ VIZRT inside
- ✓ 5-year guarantee
- ✓ IT security package & antivirus

Edit, store, plan, schedule and playout easily and quickly

Access, retrieve and control media assets reliably and safely

Go on air and thrill viewers with the quality footage they expect

## EVERYTHING INGEST

# MORE INSIDE THAN EVER BEFORE

## NewsEdit

a studio production tool especially designed for editing graphics, videos and audio. The software creates news clips without rendering delays and reduces time to air.

## Master Control Playback

known to be the best master control solution that simplifies your play-out workflows straight from creation to air.

## Studio Playback

provides full capabilities for planning, managing and transferring video files – a real asset for live productions.

## Metadator

marking, editing and jumping to highlights has never been that easy. Its main purpose is to highlight key frames by easily marking specific occasions of an event in a user-friendly manner.

## Compliance Recording

the GENESIX Loop Recorder records the entire output material one-to-one for 10 statutory weeks. User-friendly thanks to imbedded time code and intuitive surface.

## Ingest

brings your sports and news program elements in real-time and ultra-fast into your studio. All you need for automated recording!

## Playback Automation

is your flexible 24/7 playback solution that simplifies and handles all channel delivery tasks and challenges.

## Loudness Management

enhances your program and takes care of your output levels by comparing the input to a preset target level.

## SloMo

brings maximum efficiency to your content production and enhances the intuitive control of details.

## Graphics

is your all-in-one editing software for perfect storytelling of graphics and animations. Brings your content to life!

## Security Package

consists of 3 components: a hardened Windows system, daily update cycles and an in-house antivirus software.

## Playlist Scheduler

easily plans and arranges programs – specially developed for your news, sports and broadcast environments.

## Sport Live

comes with speed and slow motion mode as well as jog and shuttle to accentuate specific live moments. Specially designed for various sports and live events.

## Transfer Management

automatically copies all video clips from the playlist to the playback server's local video storage.

## GENESIX 2GO

for immediate data transportation in real time up to 16 Ch (XDCAM HD422) right after recording.

## Storage/MAM

is an intelligent approach to keep your business organized and available. Administration has never been that easy!

## AutoNaming

automatically names and categorizes clips and camera settings in logically structured directories and sub-directories.

# 16 CHANNELS

NOT A CHALLENGE BUT STANDARD

- 16 Channels in 2 rack units
- Perfect space-saving solution for OB-VANs
- Increased Multi-Cam Ingest performance
- Time-saving Transfer While Capture
- Edit While Capture for Multi-Cam Ingest

## GENESIX STUDIO PLAYOUT

GENESIX Studio Playout is a professional and sturdy playout application for live and studio environments. It manages multiple rundowns simultaneously by sharing centralized resources.

- ✓ 16 playout channels simultaneously
- ✓ Multiple channel control
- ✓ Graphic & video overlays
- ✓ Fill and key
- ✓ TDIR Multi-channel Commander

## GENESIX INGEST

Nonstop Recording from booting the server until shutting it down. The recording capacity can be configured separately for each recording channel.

- ✓ Multi-channel SD/HD/4K Ingest
- ✓ 24/7 Loop recording
- ✓ Crash/batch recording
- ✓ Scheduled Ingest
- ✓ Edit While Capture
- ✓ TDIR Multi-channel Commander
- ✓ Motion detection

# GENESIX PLAYOUT AUTOMATION

GENESIX Playout Automation is a flexible 24/7 playout solution with powerful planning capabilities.

- ✓ Multi-channel SD/HD/4K Playout
- ✓ 24/7 playout reliability
- ✓ High redundancy level
- ✓ VDCP/GPI/MOS support
- ✓ Easy & smooth integration into 3rd party systems

# GENESIX MEDIA ASSET MANAGEMENT

With GENESIX Media Asset Management video footage, audio and graphic material can easily be administered. Content management and editing, freely defined meta data and playlists can be managed, generated or edited via an integrated playlist editor.

With automatically generated thumbnail previews, different display options, filter and search functions as well as content can quickly be located.

- ✓ Intelligent storage management
- ✓ Quick search
- ✓ Integration with major NLE's
- ✓ Custom XML-Data
- ✓ Proxy editing/preview

# GENESIX SPORT LIVE

Cam	Out	Time
Cam1	Out 1	
Cam2	Cam2-01	00:15:00.00
Cam3	Cam3-03	00:15:00.00

Cam5	Cam5	
Cam6	Cam6	
Cam7	Cam7-02	00:15:00.00
Cam8	Cam8	
	Cam1-05	00:15:00.00
		00:06:22.05 - 00:08:37.19

GENESIX Sport Live

GENESIX TDIR Commander

GENESIX Sport Live has been especially designed for various sports and live events. It prepares and finalizes the output material of several cameras for up to 8in/4out at high speed.

Features such as an accurate speed and slow motion mode, jog and shuttle to accentuate specific live moments as well as the ability to process material that is still in production make it an invaluable asset for on-air broadcasting.

- ✓ 8 in / 4 out from 1 video server
- ✓ Easy and simultaneous copy of all camera perspectives
- ✓ SloMo to generate highlights while while recording, multi-channel usage, playback

# GENESIX TDIR COMMANDER

The powerful TDIR Multichannel Commander gives users full control of studio operations, news and sports coverage, live and OB-Van productions. STRYME's unique TDIR function offers state-of-the-art broadcasting:

- ✓ Direct ingest and playout steering complete with SloMo Playback
- ✓ Generate highlights while recording and feed them in during or at the end of a live production
- ✓ Multi-channel usage
- ✓ Highly professional broadcast remote control for multiple videosevers

## GENESIX GRAPHICS

- ✓ Timeline alignment
- ✓ Multiple preview options
- ✓ Assistance from numerous functional tools
- ✓ Graphic templates ready for use
- ✓ Channel branding
- ✓ Intuitive usability to generate high-quality graphics with just a few clicks

The GENESIX Graphic package handles all the modules needed for generating high quality 2D/3D broadcasting graphics in real time. New graphic layout templates can quickly and easily be designed as needed because many different templates are already included.

The GENESIX Advanced Graphic Composer is an optional powerful service-orientated graphic engine with a vast array of easy-to-use functions.

## GENESIX PLAYLIST SCHEDULER

Program planning is easy with the GENESIX Playlist Scheduler's graphic user interface. To plan and arrange programs, all it takes is a simple drag and drop from the GENESIX Media Asset Management. The XML-format ensures maximum compatibility with other systems.

# GENESIX TRANSFER MANAGER

The GENESIX Transfer Manager automatically copies all video clips from the playlist to the playout server's local video storage. In combination with GENESIX Ingest, clips are automatically copied or moved to the central storage, using our specially developed copy engine for NLE facilitates editing.

The GENESIX Transfer Manager ensures high availability of all personal files.

- ✓ Guaranteed data transfer
- ✓ Multi-destination
- ✓ Easy export management
- ✓ Transfer While Capture

## GENESIX ABROLL

Multi-channel playlist rundown

ABRoll is a combination of a centralized multi-channel playlist and a studio playout, designed to connect and visualize channels. It ensures easy handling and efficient time management on an intuitive drag and drop interface.

# Breaking NEWS

## GENESIX NEWS EDIT

GENESIX NewsEdit – especially designed for instant editing – meets all the needs of a newsroom. It enables on the fly rendering, minimizes time to air, and anticipates the demands of a fast and permanent changing broadcast environment. Speed, ease and reliability of editing graphics, videos and audio make it a highly flexible studio production tool.

- ✓ For instant rendering in real-time
- ✓ Reduces time to air
- ✓ Sophisticated news & studio solution editing tool

## GENESIX

### LOOP RECORDER Compliance Recording

The GENESIX Loop Recorder records the entire output material one-to-one for a statutory 10-week period and deletes it automatically afterwards. Features such as self-renaming sources, optional imbedded time-code, downloadable and automatic language recognition make the GENESIX Loop Recorder a highly flexible compliance recording solution. For quick and easy operation, this brand-new function enables multiple client access.

- ✓ Compliance recording solutions for a 10-week statutory period
- ✓ Easy export function of archived clips
- ✓ Intuitive surface
- ✓ Embedded time-code within the video
- ✓ Compatible with all browsers and operating systems

# GENESIX SAW

Master Control Playout is deemed the best master control solution that simplifies your playout workflows – straight from creation to air.

SAW is an automation module that combines primary and secondary events safely. Its modular architecture is highly flexible in terms of system integration and adaptability, ensuring it fits into nearly every studio infrastructure.

# GENESIX METADATOR

Metadator – to highlight key frame settings

Marking, editing and jumping to highlights has never been that easy. Metadator comes with STRYME's highly flexible Multi-Cam Ingest solution. Its main purpose is to highlight key frames by easily marking specific occasions of an event in a user-friendly manner.

- ✓ Fast and functional
- ✓ 6 x 6 grid
- ✓ up to 5 users in real time
- ✓ XML or CLS-based
- ✓ Highlighting metadata bookmarks
- ✓ User-friendly surface
- ✓ Quick & clear highlight overviews

# GENESIX AUTONAMING

Offers cutters a clear and user-friendly structure

For quick and easy retrieval, the brand-new AutoNaming function automatically names and categorizes clips and camera settings in logically structured directories and sub-directories. In the wink of an eye, the cutter finds the clips needed for editing, re-sequencing, post-production highlight cuts, etc.

AutoNaming also makes it easy to set up and customize individual user profiles and reuse clips at a later stage or for other productions.

- ✓ Names and categorizes clips
- ✓ Perfect for easy and quick editing
- ✓ Easy to set up and customize individual user profiles

# GENESIX 2GO

...immediate data transportation in real time up to 16 Ch (XDCAM HD422) right after recording

Data transfer has never been that convenient. Discover STRYME's powerful, solid and extremely portable storage combo solution for durable high capacity data transfer in real time – for up to 16 channels (i.a. XDCAM HD 422).

GENESIX 2GO fulfills the need for speed. Its high bandwidth enables rapid data transfers in real time for up to 16 channels (i.a. XDCAM HD 422). Weighing less than 3kg and with a capacity of up to 6 TB, GENESIX2GO provides high-tech storage and backup. This makes it a real asset for producers who want to be on the safe side. After recording, just unplug and go. Transferring data to your client has never been that easy!

- ✓ Up to 16 Ch (XDCAM HD 422)
- ✓ Simplifies your archiving challenge
- ✓ High performance & high speed
- ✓ Real time data transfer
- ✓ Protective hard case
- ✓ 6TB storage
- ✓ High bandwidth
- ✓ Cost efficient & flexible

## STABLE DATA TRANSFER

For reliable high-capacity data transfer in real time – for up to 16 channels (i.a. XDCAM HD 422). No time delays.

## UNPLUG & GO

The professional storage with up to 6 TB capacity. After recording, just unplug and go.

# GENESIX SECURITY PACKAGE

With integrated antivirus software.

STRYME's powerful GENESIX security package provides your with the best possible protection. It is interface-free and does not impact the performance of the server or the systems run on it.

The GENESIX Security Package is a standard feature of the GENESIX VideoServer and consists of 3 components:

- ✓ A hardened Windows system
- ✓ Daily update cycles
- ✓ In-house antivirus software

# WHAT OUR CUSTOMERS & PARTNERS APPRECIATE

"We have been using GENESIX VideoServers for years and greatly value their reliability and security. Thanks to STRYME and their strategic foresight, we have to date successfully fended off even the slightest hint of an attack on these systems."

**Andreas Bauer, Head of Maintenance & Support at ORF**

"STRYME has been instrumental in making our in-house TV channel 3Live available to all Austrians using mobile devices."

**Guenter Lischka, Senior Head of Marketing at Drei**

"We decided to partner with STRYME because of their durable and reliable solutions – high-tech, yet reasonably priced. In this sense, the GENESIX VideoServer is a real asset for the Zambian government. Parliament TV now benefits from top quality made in Austria and a fail-safe, versatile and user-friendly solution."

**Michael Jaehnel, Head of Project Sales, sonoVTS**

"GENESIX has truly exceeded our expectations. The system's technological precision, its user-friendliness, and the simple, yet intuitive Multi-Cam Ingest functions make live HD productions child's play. It's the ideal choice for broadcast studios on the move!"

**Milan Kicin, CEO at ELVIA-PRO Slovakia, s.r.o.**

"The Playout Farm enhances our position as the only German-speaking business and investors' television, and it maximizes our flexibility. Previously, we had to concentrate on the technical broadcasting issues in addition to our core business, and we operated playout separate from graphics. Now, we can focus on what we do best and offer our viewers quality entertainment over and above financial and stock market news. Playout and graphics are now reliably combined in the GENESIX system. We can feed in professional graphic overlays in real-time and adapt them as needed. These improvements have sparked new ideas for future programs and more innovative content. STRYME and ORS have opened the doors for us to unprecedented 'future-proof' aspects."

**Dr. Conrad Heberling, Managing Director at DAF**

"STRYME was the only company that could offer us an all-in-one failsafe multi-channel solution, the right graphics workflow with real-time graphics feeds, and a streaming functionality at a reasonable price. That is why we chose STRYME to join us in this project."

**Luca Catalano, CEO of the Italian broadcast and telecoms solutions specialist C.V.E.**

"GENESIX has proven its flexibility and cost-effectiveness time and again. We therefore had no second thoughts about choosing STRYME as a reliable partner to launch and realize this innovative project."

**Mr. Anton Zodi, ORS Head of DVB Operations**

## Support & Guarantee

### Support

Our **Basic Care Pack** provides you with general support via web and email during CET office hours. It covers problems that do not require immediate assistance, such as general software issues. The **Premium Care Pack** and the **Elite Care Pack** ensure that you receive daily assistance within a short or even self-defined response time. Your requests will be answered and handled by our 1<sup>st</sup> and 2<sup>nd</sup> level engineers and prioritized in the work process.

STRYME's minor and major upgrades ensure that your system is always state-of-the-art – for no additional charge.

### Guarantee

Our STRYME team may offer different delivery methods for the provision of guarantee services, including but not limited to the delivery of parts and products, remote or on-site services and maintenance.

STRYME hardware and software products may come with a **3-year, 5-year or 5-year PLUS limited guarantee period**. A 1-year guarantee period is automatically included.
