WORLD NOVELTY

THE BROADCAST INNOVATION

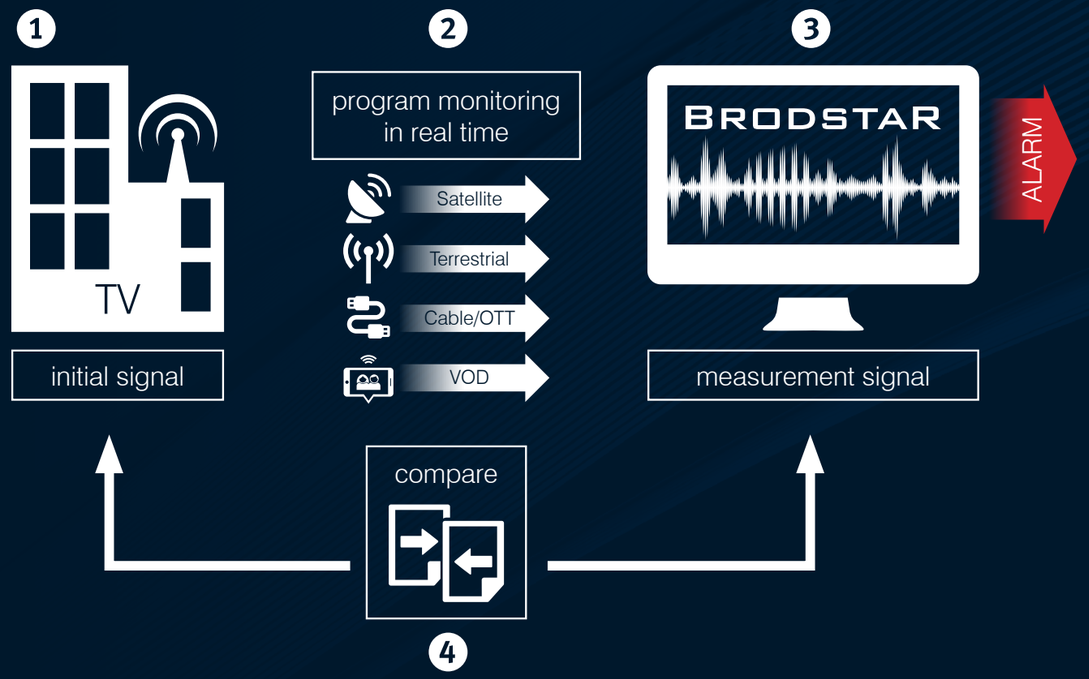
For the first time ever, STRYME presents a full-automatic 24/7 real-time quality monitoring software. As a pioneer in the broadcast sector BRODSTAR is a peerless technological innovation. It improves your compliance and analyzing activities by checking, comparing and adjusting digital delays and time lags.

The software bases on a specially developed algorithm designed by STRYME's industry experts. It simply brings optimization feedback for more professional broadcast workflow. BRODSTAR is all about maximizing your level of security, saving time and financial resources as well as warranting seamless and uninterrupted viewer experience.



WORLDS FIRST FULL AUTOMATIC PROGRAM MONITORING

- ✓ COMPLIANCE RECORDING AND LOGGING
